Project

PORTFOLIO
I am completed my portfolio using HTML, CSS and JavaScript. In my portfolio, I mentioned my all skills projects, education etc in my portfolio. I were use CSS for enhancing my portfolio.

VOICE BASED EMAILSYSTEM FOR BLIND
This is my final year project which I make for blind people who are not blessed with the vision. This project is very helpful for them as the can use the email system just like a normal person.

MODERN PERIODIC TABLE
Modern Periodic Table application provides an extensible periodic table with various properties of the elements like names symbol atomic weight atomic number. In this project we use python programming language and some python packages such as Pandas Colorama Termcolor.

Web Game Portal
Web Game Portal provides many types of games like snake game, tic tac toe game etc. In this project we use HTML CSS and JavaScript. In this game a user can login with his/her name and play also display the score or players.

Achievements

- Successfully Completed an 8-Week online Training on Python.
